Lock It or Lose It!

Protect your laptops, iPods, and cell phones from theft on campus

Every year, valuable electronic items are stolen from campus offices, libraries, and common areas, but many of these thefts can be easily prevented.

Follow these two important tips to help secure your devices.

**Tip:** Use a cable lock to secure your desktop or laptop computer to heavy furniture in your office or anywhere on campus.

**Tip:** Lock up small devices like iPods, PDAs, or cell phones, especially when you are away from your desk. Do not leave items in an unsecured purse or briefcase.
