Appropriation Notes

This institution is a signatory to the Federal Demonstration Partnership (FDP) Phase IV Agreement which requires active institutional participation in new or ongoing FDP demonstrations and pilots. Carry over of an unobligated balance into the next budget period requires Grants Management Officer prior approval.

This award reflects use of an unobligated balance of \$21,467 based on the year 16 Financial Status Report (FSR). Although this award reflects an adjustment, this is not a decrease in funding for the project.

In accordance with the November 22, 2005 letter, information regarding the program's minority recruitment plan and its implementation must be included in each non-competing continuation application. New efforts and results should be reported.

It is understood that no trainee will be permitted to work on any project involving live vertebrate animals or human subjects that has not been approved by the IACUC and/or IRB, as appropriate.

This award includes funds to support 5 trainees (60 Trainee Months). The maximum number of trainees that may be appointed without the prior written approval of NIGMS staff is 6 (72 Trainee Months) if funds are available through rebudgeting.

Conflict of Interest Reminder: All investigators must update conflict of interest disclosures as new reportable conflicts of interest are discovered. Such disclosures should be made in a timely manner in order to maintain compliance with sponsor requirements. Investigator is defined as the PI, co-PI, or any other person responsible for the design, conduct, or reporting or activities related to this project. The updated disclosure should be made on an OSR-100 form, available at <http://www.research.northwestern.edu/research/osr/forms.html>

GM060 - Active Awards - All Roles

Part of the Current, Pending and Completed Support package. All awards for a chosen researcher (any role) that are active during a chosen budget period. The total direct costs, total costs, and effort for the award are displayed along with the total funded for the project.

Navigation: InfoEd_Reports > Current, Pending, and Completed Support

Northwestern

GM060 - Current, Pending, and Completed Support

Active Awards - All Roles
Cost Sharing Not Included

The Total Received columns represent current funds that have appropriated in the financial system by OSR. The Total Anticipated column includes these amounts plus funds for future anticipated or potential budget periods. Depending on the terms of the award, these outyear funds may not be guaranteed, or additional funding may be received in excess of what is currently anticipated. Full award documentation should be consulted when determining awarded grant and contract dollars for the purposes of inclusion on current and pending reports.

| | | 4011400 - Chemistry | [REDACTED] | PD/PI | [REDACTED] | Reconfigurable Matter from Programmable Atom Equivalents | Air Force Office of Scientific Research | Air Force Office of Scientific Research | 0.00 | 0.00 | 0.58 | 1/1/17 | 12/31/21 | | | | 6/29/16 | Submitted | We propose to use a bio-inspired approach to assemble a diverse set of nanoparticle building blocks into reconfigurable, structurally sophisticated, and highly functional colloidal crystals. In particular, nanoparticles densely functionalized with DNA, or other nucleic acids of interest, will be used as programmable atom equivalents (PAEs), where specifically designed sequences are used as "bonds" to connect nanoparticles and to "encode" physical structure. Groundbreaking discoveries in the Mirkin group over the last decade with PAEs, enabled by AFOSR-funded research, have established a vast new phase space of previously inaccessible nanoparticle-based materials and, in so doing, demonstrated the extraordinary structural control afforded by our nucleic acid-mediated approach to nanoparticle crystallization. In a collaborative basic research effort, we will expand on this unprecedented degree of structural control through the creation of a new class of functional and reconfigurable PAE-based crystals. Specifically, we will synthesize and investigate new types of structurally sophisticated architectures that feature the dynamic interactions and responsiveness characteristic of most natural materials. These novel materials are expected to exhibit emergent physical properties that can be tuned on-demand and would not be possible to synthesize using any other known technique. In addition to leading to new materials important to the Air Force for high-performance structural, optical, magnetic and electronic applications, this research will contribute significantly to advancing many areas of fundamental science. |

GM086 - Projects Balances Report

GM090 - Award Projection Report

This report contains InfoEd awarded direct and indirect budgets prorated to a fiscal year value based on the award status, period start and end dates. Includes Clinical Trial awards with a billing method of "As Incurred". The amounts are then totaled for the fiscal year time frame. This report does not include fixed price clinical trials or actual NU Financials expenses.

Navigation: InfoEd_Reports > Projected Proposal/Award Trends

NORTHWESTERN
UNIVERSITY

GM090 - Award Projection Report

This report will include As Incurred clinical trials, but will not contain Fixed Price clinical trials since these projects are budgeted on a per patient basis instead of by budget period. Also, this report contains InfoEd actual NU Financial expenses. Grant budget period award amounts are prorated to a weekly value based on budget period start and end dates and totaled for the fiscal year time frame. The calculated award amount fiscal period the budget period spans.

GM093 – Cost Share Commitment Status

Presents revenue and expense data from NUFinancials Commitment Control for sponsored projects with cost sharing. It grants users a multi-year view of budget, revenue and expense on cost share funds, which elsewhere is available only on a single fiscal year basis. It also provides a comprehensive view of all departments committing cost share funds to a given sponsored project.
