To: Users who have not yet changed their password  
From: NUIT Communications  
Subject: 2nd notice - University NetID Password Change Recommended  
Date: July 7, 2005

This is a reminder that Northwestern University Information Technology (NUIT) recently discovered a server compromise that could potentially put your NetID password at risk. You are receiving this message because as of July 5th, our records show that you had not yet changed your NetID password in response to the initial notice sent to you on June 29th, 2005.

Although your NetID password is encrypted and we found no evidence that it has been compromised during this incident, as a precaution, we are continuing to strongly advise that you immediately change your NetID password to protect access to systems (including HRIS payroll information, CAESAR/SES academic information, and anything else that requires a NetID for access). It is also important to note that no personally identifiable information was stored on this server, thus avoiding any risk of exposure to your personal data.

Please click on the link below to change your NetID password.

If you have concerns regarding the validity of this message you can go to the NUIT website for secure access to the password changing page.

Thank you for your immediate response and commitment to personal and institutional information security.

For further assistance, contact the NUIT Support Center at 847-491-HELP (4357) or consultant@northwestern.edu.
