To all UNITS representatives:

As you may be aware, NUIT is offering demonstrations of NU's new E-mail Defense System (EDS) on both campuses next week in anticipation of the October 3 University-wide launch.

The PowerPoint presentation being used in these sessions provides a comprehensive look at why and how the E-mail Defense System was implemented, as well as details about EDS features and its advantages for the University community.

This presentation is being made available to you from the UNITS Web site at http://www.it.northwestern.edu/dss/units/dss-units/index.html. You are welcome to use this material if you would like to give individual EDS presentations for interested groups within your school or department.
