As previously announced NUIT has upgraded the University’s traditional Virtual Private Network (VPN) and increased overall capacity of the service. **You are receiving this message because your NetID was used to connect to the old VPN service between June 20 and July 16.** If you have not already done so, please update your computer settings to the new VPN service. As a reminder, the old VPN service will be retired in October 2012.

**HOW TO UPDATE**

To make your transition easier, NUIT has created the [Northwestern VPN configuration utility](http://www.it.northwestern.edu/supportcenter/index.html) that will configure your computer with the new VPN settings. The entire process should take about a minute. Select your operating system below for full instructions:

- [Set up VPN for Windows 7](http://www.it.northwestern.edu/supportcenter/index.html)
- [Set up VPN for Windows XP](http://www.it.northwestern.edu/supportcenter/index.html)
- [Set up VPN for Mac OS X](http://www.it.northwestern.edu/supportcenter/index.html)

**VPN settings on your mobile device** will need to be set up manually. For more information about the [traditional VPN service upgrade](http://www.it.northwestern.edu/supportcenter/index.html), visit the NUIT Web site.

Questions about information in this message should be directed to the NUIT Support Center at 847-491-HELP (4357), or visit [http://www.it.northwestern.edu/supportcenter/index.html](http://www.it.northwestern.edu/supportcenter/index.html) for additional support options.
