February 5, 2002

In reiteration of NUIT support policy, Northwestern University centralized support services no longer supports Windows 95. Microsoft officially ended support on November 30, 2001. Microsoft operating systems currently supported by both Microsoft and NUIT are Windows 98, Me, NT 4.x, 2000 and Windows XP.

For future reference, Microsoft will discontinue support for Windows 98 and Windows NT 4.x on June 30, 2003. NUIT software support guidelines can be found at www.tss.northwestern.edu/reference/supported_sw.html.

Please note: the current NUNet installer, as well as all other CD-ROMs distributed by NUIT, do not work with Windows 95.
