BEFORE YOU GO
Tips to keep you safe while traveling

- Run all updates to software and apps, install antivirus software prior to travel, and avoid public Wi-Fi. Use VPN whenever possible.
- Set secure passwords, codes, or screen locks so information can’t easily be accessed if the device is lost or stolen.
- Traveling abroad? Your data may be monitored or retained when moving across networks in other countries. Be aware of laws regarding data privacy and the search and seizure of electronic devices.
